---

Alan,

Here are some figures/tables from the Remedial Investigation Report to get started. If you have access to SDMS, the RI Report is Doc ID 685734.

Thanks,

Gary Miller

**Subject:** Re: Request for conference call w/ San Jacinto RPM to discuss R6 Dive Team work at site

that's good news, may be a very useful application for EPA divers. Where can I find the most up to date site documents, including the levels of sediment contamination? May help assist with the proper selection of the passive samplers.

**Subject:** Request for conference call w/ San Jacinto RPM to discuss R6 Dive Team work at site

Bill and Brandi,

I just finished attending a site briefing for my director Carl Edlund with the RPM Gary Miller for the

9672421

Donna Site. Not only does the RPM think we need the dive team to support for the remedial work by setting up some passive samplers around the waste pits, so does Carl!

Gary would like to schedule a call with R6 Dive Team leadership soon to discuss this collaboration. Please advise us of your availability.

Sincerely,

Valmichael Leos  
Remedial Project Manager
